

CERDAAC® 2019 Release provides enhancements to SIMCO’s cloud-based service and quality management platform that help you to deliver life-saving quality, leaner.

- **When:** The 2019 Release will be deployed to all CERDAAC® 4.0 users in the summer of 2019.
- **How:** SIMCO manages the entire CERDAAC® upgrade process for you – no end-user action is required.
- **More Info:** For more information, contact your SIMCO representative or use the contact info below.

| ENHANCEMENT | | DESCRIPTION | AVAILABLE ON |
|-------------|--|---|--|
| FEATURES | Data Export & Integration¹ | <ul style="list-style-type: none"> Automated, secure export of CERDAAC data and documents Enables back-up and integration with other software systems Timing, frequency and content of export can be tailored | Service Manager ² SIMCO Manager ² |
| | Usage Based Intervals | <ul style="list-style-type: none"> Enables usage-based service intervals (vs. time-based) Avoids over- or under-scheduling of service events Allows for combination usage- and time-based intervals | Service Manager ² |
| | Use Trace¹ | <ul style="list-style-type: none"> Ability to trace any asset’s activities (not just calibrated assets) Improved visibility and tracking of work centers (asset groups) | Service Manager ² |
| AUDITS | Audit Log | <ul style="list-style-type: none"> Enhanced audit support and more intuitive change tracking Enhancements include tracking notification email changes and links that make it easy to connect asset and service changes | Service Manager ² SIMCO Manager |
| | 17025:2017 Support | <ul style="list-style-type: none"> Updated SIMCO calibration certificates to support new decision rule requirements in ISO/IEC 17025:2017 | SIMCO Manager |
| VISIBILITY | Users, Roles & Teams | <ul style="list-style-type: none"> New hierarchy of users allows for distributed user management For example, system admins can empower managers to maintain (add, delete, edit) user accounts for their team members Greater feedback and clarity on Role and Team restrictions | Service Manager ² SIMCO Manager |
| | Expense Management | <ul style="list-style-type: none"> Shows SIMCO contract item cost and SIMCO service cost when creating shippers or viewing asset lists Simplifies calibration expense forecasting and budget planning | SIMCO Manager |
| | OOT Notifications | <ul style="list-style-type: none"> SIMCO Out-Of-Tolerance (OOT) notification emails will now include up to ten lines of OOT measurement data Enables faster OOT impact assessment | SIMCO Manager |
| | Reports | <ul style="list-style-type: none"> Improved organization of Reports allows for easier, faster access Updated and validated set of standard SIMCO Manager reports Target lines can be added to charts and graphs in a report | Service Manager ² SIMCO Manager |

1. Separate datasheet available
 2. Additional fee may apply if you wish to add functionality beyond your current CERDAAC® subscription
